

Dear FCC

I am very disappointed to learn that XM is about to have more regs shoved down her satellites. I have been a subscriber for more than three years and have enjoyed the variety of programs and the freedom to listen to static and jabber free radio.

I have travled across my United States several times and am thrilled to have found a replacement to the crap on FM radio. Each time I find a decent FM station the monopoly big brother buys it out. In my home town there is only one choice these days CLEAR CHANNEL. Why are you not protecting the little guys?? No instead you regulating them out of business. Do you not see a problem with a monopoly in the local airways. If a major event occurs we have no choice now but to listen to the biased opinion of one voice CLEAR Channel. And now you have a chance to at least allow me to listen to the radio of my choice please don't blow it! You have forced me to pay to have this choice please don't take it away. I fear if you bow to nab what's next nazi type radio? Where you choose what and when I can listen??

Don't do it!
